

KHP REEL DEAL OPEN

Article By: Trooper Tom

February 24, 2008 was our first local youth fishing tournament for the youth club. The tournament was held at Bud Cain Lake, 4900 W. 21st North, Wichita Kansas. It's known by the locals as Cainville and is one heck of a fishery. It's a private lake and we especially want to thank Bud Cain for allowing the KHP REEL DEAL to hold our first ever event at this location. In this day and age it's not easy to find a body of water to fish that is close by. Bud has greeted us with open arms and given the kids the opportunity to fish a great bass fishery. I just hope later in the season we will get an invitation to hold another tournament at this location.

Some may think that's early to hold a tournament and I agree with you but in order to qualify to fish the state tournaments this year it forced us to start early. The night before this tournament we had about three inches of snow that made driving very bad, I know, because I worked a lot of accidents late into the night. The temperature that morning was 34* when the kids hit the water and only 37* when they got off the water. Water temperature was only in the mid forties and made for some tuff fishing conditions not only with the rod and reel but on the body also. Even with no fish caught on this day I never heard a complaint. The one thing I can say is we have some tough kids in our group and they are going to be competitors when the season heats up. As this season progresses keep your eyes on these kids, they are, KHP REEL DEAL!!

Tight Lines!!
